## 1. Policy Statement

Herzing College is committed to providing a safe and healthy work environment for all members of the College community. The onset of COVID-19 has created a number of unprecedented challenges. In a matter of days learning at Herzing College moved from a traditional classroom setting to an on-line format. Employees and students relocated from Herzing College campus to their homes to continue the learning process. Access to campuses for staff was severely restricted and managed. As we start to slowly return to the workplace, there will be many challenges for both staff and students. This policy will outline interim changes to policies, processes and procedures that will guide a safe return to all members of the Herzing College community.

Herzing College has followed the advice of local Public Health departments in the development of this policy and has complied with federal and provincial Public Health Orders. In all cases the Public Health is the primary authority. Herzing College also reviewed federal guidelines and advice as well as that from the World Health Organization (WHO) and Centers for Disease Control (CDC).

All members of the Herzing College community are reminded that communications and contact tracing are the responsibility of Public Health. Herzing College will cooperate with Public Health appropriately and will not otherwise advise the College community regarding COVID-19 without their direction.

This policy supersedes all other Herzing College policies where there is an overlap until the time that it is rescinded. Due to the rapidly changing environment as a result of COVID-19, this policy is susceptible to rapid changes.

Herzing College will continue to monitor Public Health Directives and will adjust our approach based on these directives. This includes implementing a gradual, phased-in approach as we move towards returning to the Herzing College campuses. This will be done in a safe manner and will require patience. There may be continued relaxation and tightening of directives will always be the number one priority.

It is important that we all respond responsibly to these new requirements and take all necessary health precautions.
